SUMMARY

Backend developer (fresher) skilled in Python, Django, and FastAPI, with hands-on experience designing REST APIs, containerized deployments, and concurrent transaction systems. Built and deployed two production-style backend projects (digital wallet and real-time log monitoring system) using Docker, PostgreSQL, and Redis. Seeking a Backend/Software Development Engineer role to apply strong fundamentals in system design and clean, scalable code.

TECHNICAL SKILLS

- Languages: Python, C++
- Backend & Frameworks: Django, FastAPI, REST APIs, OAuth 2.0, JWT
- Libraries & Data: Pandas, BeautifulSoup
- AI: LangChain, FAISS (RAG)
- Databases: PostgreSQL, MongoDB, Redis
- DevOps & Tools: Docker, Kubernetes, AWS (EC2, S3), GitHub Actions, Git, Linux, Bash

PROJECTS

PayFlow – Digital Wallet System (GitHub)
Python, Django, FastAPI, PostgreSQL, Docker, AWS

- Engineered a secure backend for a digital wallet system handling concurrent financial transactions with strict ACID compliance.
- Ensured data integrity using PostgreSQL row-level locking (SELECT FOR UPDATE) to eliminate race conditions during high-volume transfers.
- Built real-time balance validation and fraud detection logic to enforce transaction limits and enhance security.
- Containerized the application with Docker and deployed it on AWS EC2 in a production-ready environment.

LogSentinel – Real-Time Server Monitoring System (GitHub)
Python, WebSockets, Redis, Docker

- Built a high-performance observability system to capture and categorize live system logs (INFO, ERROR, CRITICAL) in real time.
- Optimized log streaming with WebSockets, reducing critical alert latency to under 200ms.
- Designed an asynchronous processing pipeline using Redis as a message broker for high-throughput log streams.
- Automated incident notifications via Telegram and Email webhooks for server crashes or database failures.
- Containerized the full stack with Docker for environment parity and scalable runtime isolation.

EDUCATION

Chaudhary Devi Lal University | *B.Tech, Computer Science Engineering* — Sirsa, India
Nov 2022 – June 2026 | CGPA: 8.5/10

CERTIFICATIONS

- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate — Oracle University (Sep 2025)

EXTRACURRICULAR ACTIVITIES

- **ISRO Hackathon 2025 —** Participated, building backend solutions for a national-level space-tech challenge.
- **Open-Source Contributions —** Patched bugs and optimized performance in community-driven projects.
